INSTALLATION

Before Use:

Make sure all the devices are power off.

External Mounting bracket installing (All ULD/TLD & 17" ULG/TLG serial products):

- Screw the front flange to the rack first. Slide the bars with the rear flange towards the rack until the flanges make contact with the rack, then screw the rear flanges to the rack.

- Slide the switch onto the support flanges. Use the screws supplied with this package to loosely attach the front of the switch to the front of the rack.

- Slide the rear attachment sliding brackets along the slide bars until they contact the rear of the switch.

- Use the screws supplied with this package to attach the bars to the rear of the switch

Built-in mounting bracket installing (All ULS/TLS/DLS & 19" ULG/TLG Serial products):

- The built-in mounting bracket comes with a nut, and the fixing nut is welded inside the bending hole at the top of the bracket. Install the bracket into the cabinet mounting post on the upper cabinet, align the bracket mounting holes with the holes in the cabinet mounting column, and then use the screws to fix.

- Place the KVM Switch in the installed bracket and secure the KVM Switch, cabinet and mounting bracket.

- Mounting and fixing in the bracket tail

- Screws mounting position instruction

POWER ON

- Connect power cables to the KVM

- Connect KVM to PC or server

Note: Power on after the KVM cable is properly connected.

OPERATION

- Pull the KVM control platform out from cabinet totally and release front lock.

- Then open the front panel and the LCD can be turn on to 120 degrees. As shown below:

After use

- Press LCD power key, the LCD is power off.
- Close LCD panel and lock the front panel.
- Release guide lock.
- Push the control panel into the cabinet totally, and then it is power off.
